WEIGHT:	1.99 LBS

24x24 Eco Flap

ECOFLAPS have patented wing-shaped channels designed to reduce aerodynamic drag and road spray by 70%, making them the most efficient and safe mudflap on the market. With over 30 3rd party independent fuel tests, Eco Flaps are proven to save 1-3% of fuel.

Injection molded from an industrial grade nylon, ECOFLAPS are built to withstand extreme conditions. They are unbelievably tough and highly resistant to flap "pinch," which means additional savings because you spend less on repairs or replacement costs.
